Further Reading Suggestions.

Almost every recent overview of pronunciation laments the previous state of the field, while acknowledging an explosion of research. Some important names are:

Derwing, T. M., & Munro, M. J., who continue to be active in pronunciation research, individually and together. The PronSIG magazine **Speak Out** (Feb 2025) has an interview with Derwing and Munro covering the genesis of their seminal 1997 paper.

Isaacs, T., Trofimovich, P., and Saito, K. who are key researchers in the field and have published extensively, individually and in collaboration.

John Levis, a very influential figure. *Intelligibility, oral communication, and the teaching of pronunciation* is a detailed discussion of the whole field, synthesising research into a very wide range of issues and L1s.
